

I am trying to get a group together to collect water hyacinth weevils in Edna, TX. Do you know of any students that may want to help? Is there an aquatic weeds club, or maybe the wildlife society or other students that may want volunteer hours? It should be fun wading through muck collecting the weevils :) Please forward this to students that may be able to help...

I am also looking for volunteers that may also help me, in conjunction with TPWD officials, collect salvinia weevils at Toledo Bend Reservoir sometime within the next month. It should be a good time!
